WORK EXPERIENCE

Xplor Technologies

June 2025 – Present

Software Engineer I

Pune, India

- Developed and maintained **REST APIs** and full-stack features using **ASP.NET Core, Vue.js, TypeScript, and SQL Server** for a large-scale SaaS platform, collaborating with cross-functional teams to deliver production-ready functionality.
- Designed and implemented an **Event-Driven Architecture** using **Azure Service Bus** for **Asynchronous Messaging** between **Microservices**, reducing synchronous dependencies and improving system reliability and scalability.
- Built customer communication workflows using **Twilio SMS, Voice APIs, Azure Functions, Webhooks, and Background Processing**, integrating third-party services for reliable **API Integration** and automated customer notifications.
- Implemented **Real-time Communication** using **SignalR** in a Vue.js frontend, replacing polling-based updates to deliver instant data synchronization and improve application responsiveness.
- Improved production observability by implementing **Centralized Logging** and **Distributed Tracing** with **Coralogix**, enabling efficient **Production Debugging**, root cause analysis, and faster incident resolution across distributed services.
- Optimized application performance through **SQL Query Optimization**, indexing, stored procedures, and efficient data access patterns in **SQL Server**, improving query execution time and backend performance.
- Developed and maintained automated **Unit Tests** using **xUnit, Moq, FluentAssertions, and Jest**, while contributing to **CI/CD** pipelines, ensuring reliable deployments, preventing regressions, and supporting continuous delivery.

Centre for Development of Advanced Computing (C-DAC)

Software Engineer Intern

Pune, India

- Developed a web platform for forest fire data management and prediction using **React, Spring Boot, and PostgreSQL**.
- Built responsive dashboards using **React, Material UI, Tailwind CSS, and Redux Toolkit** for realtime visualization of data.
- Developed **REST APIs** using **Spring Boot** and **PostgreSQL** for managing prediction and geographical datasets.
- Implemented **JWT-based authentication** and role-based authorization using **Spring Security**.

TECHNICAL SKILLS

Languages: Java, C#, TypeScript, JavaScript, Python, Go, SQL

Databases: MySQL, Postgres, Microsoft SQL Server, MongoDB, Redis

Technologies: Git, Docker, GitHub Actions, Amazon Web Services (AWS), Microsoft Azure

Frameworks: ReactJS, Vue.js, Next.js, Angular, Express.js, Spring Boot, ASP.NET Core, Jest, JUnit

Tools: Claude Code, Cursor, Github Copilot, JIRA, GitHub, Azure Devops

PROJECTS

Urban Clamp - Household Services Platform | *Spring Boot, Next.js, MySQL, Kafka, Redis, ASP.NET Core, Express.js*

- Designed a microservices-based household services platform using **Spring Boot, Kafka, Redis, and MySQL**.
- Implemented **asynchronous communication** between Booking, Notification, and Payment services using **Kafka streams**.
- Integrated **Kafka** for **event-driven communication** between services, improving system reliability and responsiveness.
- Reduced database load through **Redis caching** for frequently accessed service metadata.
- Configured **Prometheus metrics** collection and **Grafana dashboards** for service monitoring and health tracking.
- Built independent **microservices** using **ASP.NET Core** and **Node.js** to evaluate interoperability across services.

Kimble - Story Sharing Platform | *React.js, Tailwind CSS, Redux Toolkit, Node.js, Express.js, MySQL, NodeMailer, Docker*

- Built a full-stack story-sharing platform using **React, Express.js, and MySQL**.
- Implemented email verification and account activation using **NodeMailer**.
- Designed **REST APIs** supporting authentication, story management, and user interactions.
- Managed application state using **Redux Toolkit** for predictable client-side data flow.

EDUCATION

Savitribai Phule Pune University

Pune, India

Bachelor of Engineering(B.E.) in Computer Engineering — CGPA: 9.63/10

ACHIEVEMENTS & LEADERSHIP

- Runner-Up** at **Smart India Hackathon 2020** for developing a **Sentiment Analysis System** for **Code-Mixed** language.
- Technical Lead** at **Google Developer Students Club** for the year 2020-21. Organized and presented at over 10 developer events mentoring over 200 students in developer activities and Google Cloud Platform.
